

Your Tenants Are Required To Provide Customer Recycling Bins

California law (AB 827) requires that retail and food service tenants offer accessible recycling and organics containers wherever customers consume and discard food and beverages on-site.

- Recycling bins must be placed adjacent to trash containers (except in restrooms).
- Bins must be visible, accessible, and clearly labeled.
- Separate containers are required for recyclables and compostable food scraps.
- Full-service restaurants where staff clear waste are excluded.
